Guest Lecture on The Data-Centric AI Revolution; Shifting Focus from Models to Information

The ICFAI University, Raipur successfully organized an Expert Session on “The Data-Centric AI Revolution: Shifting Focus from Models to Information.”

The programme commenced with the gracious address of the Hon’ble Vice Chancellor, Prof. (Dr) Shiv Dayal Pandey, who emphasized the crucial role of emerging technologies like Artificial Intelligence and Data Science in shaping future-ready professionals and encouraged students to focus on data-driven innovation and ethical use of AI.

We were privileged to have Dr. Sreejit Panicker, Training Head, Techment Technology, Bhilai, as the resource person. His insightful deliberations highlighted the significance of data quality, information-centric AI, and practical industry applications.

The session was jointly organized by the Corporate Resource Centre (CRC) and the Faculty of Engineering & Technology, and witnessed active participation from students and faculty members.

Such expert interactions strengthen industry-academia collaboration and inspire learners to stay ahead in the rapidly evolving AI landscape.
